

Preparation

Page without code

This page contains an example for some structured preparation information for a workshop. No code is executed here.

Here are some preparation information for the participants.

Software

In this workshop we will be using R. You can either

- have **R and Rstudio** installed on your laptop
- or, use **Posit cloud** (formerly Rstudio Cloud).

Posit cloud is free of charge for personal users, yet you need to sign up for a new user account and have internet connection.

The R package we are using is `glmnet`.

Data

The datasets we use can be found here (*insert link*).

Code

The R scripts used in part 1 and part 2 can be found here (*insert link*).

Resources

Lecture notes (*insert link*)
